

# Amin Chogueur

## Front end web Developer

With one year of experience specializing in React and Next.js, I create fast, responsive, and user-friendly web applications. My work emphasizes clean code and delivering a seamless user experience. I am currently seeking opportunities to join a company where I can further develop my skills by collaborating with a talented team. I am eager to contribute my expertise in front-end development, particularly in React and Next.js, while continuously learning and growing as a developer.

Redux

## PERSONAL PROJECTS

### Made4Cloud Company Website

- Designed and maintained a professional, multi-language website for Made4Cloud Ltd to showcase Salesforce services and enhance client engagement. Currently working on adding a blog page that dynamically retrieves data from an API connected to the admin panel.
- **Technologies** : Next.js, Tailwind CSS, React Icons, React-Toastify.

### Ghiz Read App With Admin Panel

- Built a web application for a private library where users can browse, search, and order books. The app provides a seamless shopping experience, allowing users to add books to their cart and place orders directly from the website. The library owner can manage the book catalog and track customer orders.
- Built an admin dashboard for managing the library's book database. Includes features for adding, updating, and organizing book categories.
- **Technologies** : Next.js, MongoDB, TypeScript, Tailwind CSS.

### Daily Tasks Platform

- Developed a fully responsive daily task management App, The platform enables users to securely Sign up, create, update, delete, and prioritize tasks, with filters for task status (To Do, In Progress, Completed) for efficient organization and tracking.
- **Technologies** : Next.js, MongoDB , Redux , Tailwind CSS, Next-Auth.
